

SURGICAL INSTRUMENTS ARE ONLY AS CLEAN AS YOUR STERILIZER

Steri Clean Provides a sterilizer cleaning service to ensure that sterilizer units are operating at a maximum efficiency.

- OEM Manufacturers recommend that sterilizers be cleaned annually to keep them functioning properly
- Removes build-up on sterilizer walls to increase the proficiency and reduce failures and rejected packs
- Improves a sterilizer's heating and drying capabilities
- Use of improper sterilizer cleaning methods will increase a hospital's repair costs significantly
- Reduces patient risk of infection from improper sterilization
